Research and Innovation Action

Mulargia-HYPE simulated data of total nitrogen concentrations in outflow from subbasin (Mulargia)

Mulargia_CCTN.txt

The project has received funding from the European Union's Horizon 2020.
Research and Innovation Programme under Grant Agreement No 870497.

General

Description

simulated concentration of total nitrogen species in outflow from outlet lake/subbasin

Parameters

simulated concentration of total N in outflow from subbasin

Unit

µg Tot-N/L

Coordinate reference systems

WGS 84 (EPSG: 4326)

Data type

.txt

Keywords

Hydrology, Simulated

Dataset coverage

Spatial coverage

entire case study / river system

Spatial resolution

subbasins

Temporal coverage

01/01/2015 - 31/10/2020

Temporal resolution

daily

The HYPE model code is available from the HYPEweb portal (<http://hypeweb.smhi.se/model-water/>). Historical values are obtained through HYPE services developed for the PrimeWater project and could become available upon request through <https://hypeweb.smhi.se/water-services/data-delivery-services/>
